## PROFESSIONAL SUMMARY

Second-year B.Tech Computer Science student and aspiring Full Stack Developer with practical experience building and deploying end-to-end web applications. Skilled in responsive frontend interfaces and backend REST APIs using Java, Spring Boot, Spring Security, Node.js, Express.js, JavaScript, and SQL databases (MySQL, MariaDB). Focused on clean code, systematic debugging, and continuous learning, using AI-assisted tools to improve development workflows while thoroughly understanding, reviewing, and testing all code.

## TECHNICAL SKILLS

**Programming Languages:** Java, JavaScript, C, C++, SQL

**Frontend Development:** HTML, CSS, JavaScript, React Fundamentals, Tailwind CSS, Responsive Web Design

**Backend Development:** Java, Spring Boot, Spring Security, JWT, Node.js, Express.js, RESTful APIs

**Databases:** MySQL, MariaDB, Relational Database Design, SQL Queries

**Tools and Technologies:** Git, GitHub, VS Code, Maven, Postman, npm, Netlify, Render

**AI-Assisted Development:** Using AI tools to support coding, debugging, understanding concepts, learning new technologies, and improving development workflows—while manually reviewing, verifying, and testing all project code

## PROJECTS

**Galgotias LMS** | Java, Spring Boot, Spring Security, JWT, MariaDB/MySQL, HTML, CSS, JS, Maven GitHub | Portfolio

- Built a full-stack Learning Management System with dedicated student, teacher, and admin workflows and interactive academic dashboards.
- Implemented role-based authentication and authorization with Spring Security and JWT to secure role-specific academic routes and resources.
- Developed Spring Boot REST APIs connected to MariaDB/MySQL for course management, interactive quizzes, assessments, and academic activities.

**Cafe and Hotel Haven** | Node.js, Express.js, MySQL, HTML, CSS, JavaScript GitHub | Portfolio

- Developed a cafe and hotel management website with full frontend and backend integration to present hospitality services and management workflows.
- Engineered backend REST APIs using Node.js and Express.js integrated with MySQL for persistent data storage and dynamic service management.
- Created a responsive frontend interface using HTML, CSS, and JavaScript for intuitive navigation across desktop and mobile devices.

**KUNJ'S PG HOUSE** | HTML, CSS, JavaScript, Responsive Web Design GitHub | Portfolio

- Designed a responsive PG accommodation website showcasing structured room information, resident facilities, and transparent pricing details.
- Built interactive client-side features and a booking inquiry interface using HTML, CSS, and vanilla JavaScript to handle tenant inquiries.

## RELEVANT DEVELOPMENT EXPERIENCE

**Independent Project Development — Full Stack Web Applications** Self-Directed & Academic Projects

- **Full Stack & API Integration:** Built end-to-end web applications connecting responsive HTML/CSS/JS views with Spring Boot and Node.js/Express.js REST APIs backed by MySQL and MariaDB.
- **Debugging, Version Control & Deployment:** Debugged application issues, verified APIs with Postman, managed repositories using Git and GitHub, and deployed applications on Render and Netlify.
- **AI-Assisted Workflows:** Applied AI tools for coding support, debugging, and concept exploration while manually writing, reviewing, and testing all application logic.

## EDUCATION

**Bachelor of Technology (B.Tech) — Computer Science and Engineering (CSE)** Second Year, Third Semester

Galgotias University
